The nucleotide sequence has been determined by using restriction

fragments and nested deletion fragments of the ordered cosmid

library of pSLA2-L.

pSLA2-L is 210,614 bp long with G+C content of 72.8 % and carries

143 ORFs.
                                                                                                                                                                                                                                                                                                                                                            http://www.nih.go.jp/~jun/cgi-bin/frameplot.pl. Where possible we chose an initiation codon (atg, gtg, ctg or ttg) which is preceded by an upstream ribosome binding site sequence (optimally 5-13 bp before the initiation codon). If this could not be identified we chose the most upstream initiation codon.

Three-fourths of the pSLA2-L DNA are occupied by biosynthetic genes (three PKS gene clusters for lankacidin, lankamycin and an unknown type II polyketide, a carotenoid biosynthetic gene cluster, many regulatory genes and others). The range of each biosynthetic gene cluster has been deduced by comparison with similar gene clusters in most cases and may be revised in future.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Mochizuki,S., Hiratsu,K., Suwa,M., Ishii,T., Sugino,F., Yamada, and Kinashi,H.

The large linear plasmid pSLA2-L of Streptomyces rochei has an unusually condensed gene organization for secondary metabolism Mol. Microbiol. 48 (6), 1501-1510 (2003)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Gene prediction was based on the unique codon usage in Streptomyces (Bibb et al., Gene 30:157-66 (1984)) using the FramePlot program of Ishikawa and Hotta (FEMS Microbiol Lett 174: 251-253 (1999)) as
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Hiratsu, K., Mochizuki, S. and Kinashi, H.
Cloning and analysis of the replication origin and the telomeres
the large linear plasmid pSLA2-L in Streptomyces rochei
Mol. Gen. Genet. 263 (6), 1015-1021 (2000)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Identification of two polyketide synthase gene clusters on the linear plasmid pSLA2-L in Streptomyces rochei Gene 246 (1-2), 123-131 (2000)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Suwa, M.,
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Biosci.
